

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Original) A medicament dosage unit consisting essentially of a beta-adrenergic blocker and a platelet inhibitor together in a single dosage unit quantity sufficient to provide a cardiovascular protective dosage.
2. (Original) The dosage unit of Claim 1 wherein said dosage unit is formulated as a once-a-day dosage unit.
3. (Original) The dosage unit of Claim 1 wherein said platelet inhibitor is aspirin.
4. (Original) The dosage unit of Claim 1 wherein said beta-adrenergic blocker is atenolol.
5. (Currently amended) The dosage unit of Claim 1 wherein said beta-adrenergic blocker is propranolol propanolol.
6. (Original) The dosage unit of Claim 1 wherein said beta-adrenergic blocker is timolol.
7. (Currently amended) The dosage unit of Claim 1 wherein said beta-adrenergic blocker is metoprolol metaprelol.
8. (Original) A method of treating cardiovascular disease said method comprising: formulating a single dosage unit consisting essentially of a beta-adrenergic

blocking agent and a platelet inhibitor in a single dosage unit quantity sufficient to provide a cardiovascular protective dosage; and administering said single dosage unit to a patient.

9. (Original) The method of Claim 8 further comprising indicating the use of said dosage unit for treating cardiovascular disease.
10. (Original) The method of Claim 8 further comprising providing instructions for administering said single dosage unit.
11. (Original) The method of Claim 8 wherein said formulating step further includes formulating said single dosage unit as a once-a-day dosage unit.
12. (Original) A method of making a cardiovascular protective dosage unit comprising formulating a single dosage unit consisting essentially of a beta-adrenergic blocking agent and a platelet inhibitor in a quantity sufficient to provide a cardiovascular protective dosage.
13. (Original) The method of Claim 12 wherein said platelet inhibitor is aspirin.
14. (Original) A medicament dosage unit consisting essentially of a beta-adrenergic blocker and aspirin combined in a single dosage unit in sufficient quantity to provide a cardiovascular protective dosage.
